

Antonio Wong

Co-founder and CEO of GreenSafety Technology

Antonio Wong is a young entrepreneur born in Macao SAR. He graduated from the Department of Statistics, University of Manchester in the UK. Antonio has been dedicated to public affairs and committed to the use of big data and Internet of Vehicles (IoV). Formerly an investment banker, Antonio became the Co-founder and CEO of GreenSafety Technology Limited (aka "GST"), a Hong Kong-based start-up company headquartering in the Hong Kong Science Park, in 2015.

GST is committed to researching and developing anti-collision warning and safety management solutions for a variety of transportation vehicles. By making good use of Big Data analysis, "4S Solution" was officially launched in 2017 with invention patent. In Dec 2017, GST has provided "4S Solution" service to business partners in Hong Kong, Macao, the Chinese mainland, Taiwan and other places.

In 2018, Antonio co-founded a think tank called EntreLink with several young entrepreneurs in Hong Kong. He wishes to use his fund management experience and entrepreneurship to build a "Smart City", starting from Hong Kong.
