

Mark Mak

Co-founder and Chief Technology Officer
Roborn Technology Limited

Mark Mak held an MBA degree from The Chinese University of Hong Kong. He also held a Master of Philosophy degree in Electronic and Computer Engineering. Mark is a robot enthusiast since his childhood. He invented the Motion Control Humanoid Robot “ME” and its algorithm. In 2017 he found Roborn Dynamics Ltd with his business partner, Eden Lu. In 2018, Mark led the team in establishing strategic partnership with ZTE and China Mobile, and further turned “ME” to a 5G compliance motion control humanoid robot, which is the first 5G motion control robot in China. Currently Mark is the Co-Founder and Director of Roborn Group and Roborn Technology Limited responsible for tech and strategies. Mark has extensive experience in robotic and engineering, he once worked for a number of tech companies including tech companies in NASDAQ.
